| React JS | Redux | Javascript | Front-End | Web Development
| Tailwind CSS | Webflow | Web Design | Figma | Git | GitHub |
Node.js | MongoDB |SEO
New Delhi, Delhi, India

Summary

A passionate software engineer with four years of experience in
building high-performance web and mobile applications across the
stack. With expertise in React.js, Next.js, and React Native, I create
solutions that are both functional and engaging. My backend skills
with Node.js and MongoDB enable me to deliver comprehensive,
full-stack applications.

Currently working at Jobtrees PVT. LTD., I focus on enhancing
web applications, maintaining performance, and delivering new
features. I also have freelance experience as a Webflow developer,
where I've designed and deployed responsive, optimized websites.
With a growing interest in AWS and Cloud Computing, I aim to
leverage cloud technologies to improve application scalability and
performance.

Experience

jobtrees.com
Software Engineer
November 2021 - Present (3 years)
India

Develop and maintain web applications using React.js, Next.js, and React
Native, ensuring optimal user experience.
Collaborate with cross-functional teams to resolve bugs and add new features,
enhancing overall site functionality.
Use Git and GitHub for version control, ensuring consistent code quality
through regular code reviews.

Freelance
FrontEnd and Webflow developer/ Designer
March 2021 - December 2022 (1 year 10 months)

Designed and delivered modern, responsive websites using Webflow, focused on performance and aesthetics.

Worked closely with clients to create tailored web solutions, meeting both design and technical requirements.

Applied best practices in UI/UX and web performance optimization to enhance site loading speed and user engagement.

ASIT consulting pvt. Ltd.
Cyber Security Analyst
September 2019 - February 2020 (6 months)
India

Assisted in securing systems by monitoring and implementing cybersecurity protocols.

Identified vulnerabilities and contributed to improving system security measures, enhancing overall protection.

Hyper Reality Studio Pvt. Ltd.
Game Developer
February 2019 - July 2019 (6 months)
India

Developed mobile applications with augmented reality features, focusing on interactive user experiences.

Collaborated with the development team to design and test applications, ensuring functionality and engagement.

Education

Sikkim Professional University
Bachelor of Computer Application, Computer Science · (August 2020 - August 2023)
